

ARINCDirectSM Wi-Fi call and text app

Make and receive calls and texts with your own mobile phone while connected inflight

The ARINCDirectSM Wi-Fi call and text app, from Rockwell Collins, utilizes your broadband Inmarsat (i.e. SwiftBroadband and Jet Connex) and ViaSat Mobile Broadband service connection from your aircraft, allowing you to make and receive calls and texts on your personal cell phone anywhere in the world.

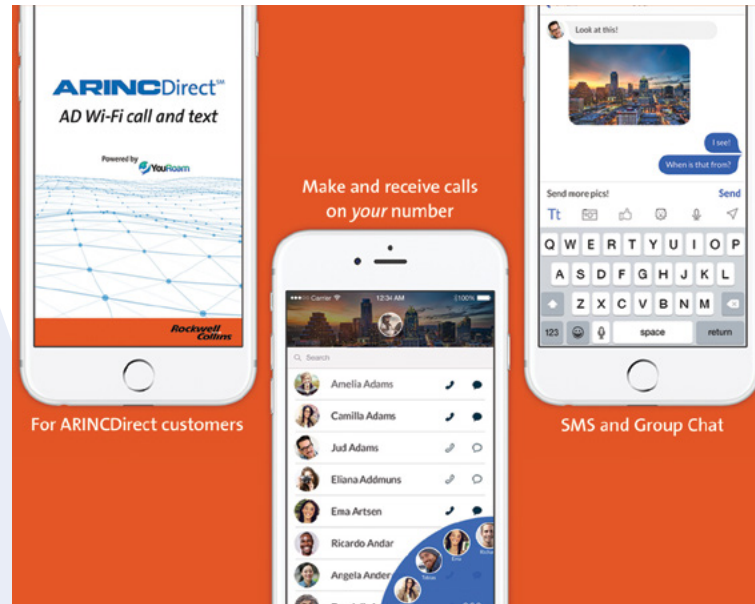

With ARINCDirect Wi-Fi call and text you can expect:

- A low, fixed monthly charge per user for unlimited voice calls and texts
- Seamless integration with your ARINCDirect broadband connection onboard the aircraft
- Compatible with the open, smart cabin router offered by ARINCDirect and other airborne smart routers
- Policy-based routing and quality of service available on multiple airborne routers

The app is available for the Apple iPhone®, iPad®, iPod® touch and Android™ 2.3 and up. After downloading your app, visit the ARINCDirect website to complete the ARINCDirect Wi-Fi call and text service order form.

Features

- Know who is calling you with smart caller ID
- Use the contacts already in your phone for calls and text messaging
- View missed calls even if your phone was turned off
- High call quality reception over Wi-Fi

Download today

Use your personal device inflight to call and text anyone in the world using your own phone number and contact list.

\$9.99/download

\$89.95/month

If you have any questions about activating your app, email our Activations Team at activations@arinc.com or call +1 410.266.2299. Contact your ARINCDirect sales representative for more information.
